REZA'S

LTD
Beauty Semi-Permanent

THE NEW GENERATION

REZA'S BEAUTY SEMI-PERMANENT

REZA'S BEAUTY SEMI-PERMANENT

The ORIGINAL REZA'S METHOD

For a 24 hour perfect and natural look.

"We have developed a special technique so that no lines can be drawn incorrectly. Our method differs from conventional methods:

You do not look made-up.
Vegetable dyes are used as pigment.
You can make corrections with skin colours.

REZA's Beauty Semi-Permanent is a special type of cosmetic treatment that has been developed and refined over a number of years. The original REZA's method is recommended and used by numerous cosmetic surgeons and beauty therapists both in England and abroad as a natural supplement to corrective beauty treatment.

Aim

To look good all day long without spending time and without making up. A natural, groomed appearance around the clock for several years.

A couple of critical questions:

Do you have perfectly grown and shaped eyebrows?

Are your eyelashes thick and dark?

Do your eyes look big and sparkling?

Are your lips even in shape and colour?

If you can answer "YES" to all these questions, "Congratulations!" you do not need REZA's Beauty Semi-Permanent. Otherwise, we are there to help give you the look you want and deserve.

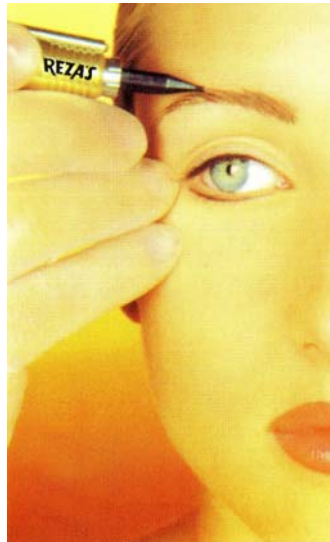

Before

Before Treatment

An individual consultation is available free of charge from your "Beauty Semi-Permanent Designer" to ascertain your needs.

The contours are first drawn in using a special pencil, so that you can see the desired effect in the mirror. The colour will also be mixed and agreed at this time.

The Treatment

The desired effect that was drawn on during the consultation will now be implemented. The surface of the skin is slightly anaesthetised using an ointment, helping to ease sensitivity. The natural colour of your hair and lips are individually mixed and placed into the top layer of the skin ensuring only semi-permanent results, not permanent. All the needles used are sterile packed and used only once. The treatment takes around 1 hour.

Eyebrows

If you have no eyebrows, they can be designed from scratch. Missing or very fine hair can be supplemented by REZA's specially developed fine hair drawing. Expressive, beautifully shaped eyebrows will create a "frame" for your face.

After

Eyelids

The eyes are made to look bigger by lining the edges next to the upper and lower eyelashes.

This evens out any eyelashes that are missing or too thin. The effect of depth will make your eyes appear to sparkle.

Lipliner

If your top or bottom lip is too thin, it can be made to look bigger by correcting the edge of the lip.

In addition, any red colour missing or too weak can be supplemented.

REZA's Method II

The skin is pigmented with hypo allergenic vegetable dye using microfine needles.

The pigments are placed approximately 0.8 - 1.3 mm deep in the skin. This fine work is only possible using a special technique developed by REZA itself.

Years of experience and detailed knowledge have been used in the design of the REZAGRAPH II Professional model and in the new REZAGRAPH I version of the equipment. All the devices have been tested by the German Technical Control Board (TUV), are certified to CE standard and bear the German seal for tested safety (GS)
